

2-Chloro-4-nitrobenzene- α -galactose-maltoside (Gal-G2-CNP)

Product Information

Cat#	BDE-029
Specification	1 g, 50 g, 100 g
Description	2-Chloro-4-nitrobenzene- α -galactose-maltoside (Gal-G2-CNP) is a synthetic chromogenic substrate for α -galactosidase, suitable for dry chemistry and biochemical analysis systems.
Applications	Used as a chromogenic substrate in α -galactosidase assay kits.
Form	Grayish-white to pale yellow powder
Molecular Weight	659.97
Purity	$\geq 90\%$
Chemical Formula	C ₂₄ H ₃₄ CINO ₁₈
Storage	Store at -25 to -15°C in a sealed, dry container away from light.
