

Alpha-Amylase

Product Information

Cat#	DIA-609
Descriptions	Alpha-Amylase efficiently breaks down starch and polysaccharides by hydrolyzing internal alpha-1,4 glucosidic bonds, with strong adaptability for carbohydrate degradation and food industry related research.
Applications	Alpha-Amylase is widely applied in starch content detection kit development and carbohydrate biochemical assay reagent preparation.
CAS No.	9000-90-2
Synonyms	1,4-alpha-D-Glucan-glucanohydrolase
