

Beta-Mannanase

Product Information

Cat#	DIA-650
Descriptions	Beta-Mannanase is a glycoside hydrolase that randomly cleaves internal β -1,4 mannosidic bonds in mannan polysaccharides, degrades various hemicellulose substrates, and is extensively utilized in food processing, feed production and lignocellulose biorefinery research.
Applications	Beta-Mannanase is widely applied in mannan polysaccharide content detection kits and hemicellulose component assay reagent development.
CAS No.	37288-54-3
Synonyms	Mannanase, endo-1,4-beta-; endo-1,4-beta-mannanas; endo-1,4-beta-Mannanase; endo-B-1,4-Mannanase; beta-Mannanase; endo-beta-1
