

Carboxypeptidase B

Product Information

Cat#	DIA-675
Descriptions	CARBOXYPEPTIDASE B is a zinc-dependent exopeptidase that specifically cleaves basic amino acid residues from the C-terminus of polypeptide chains, is widely used in protein sequencing and proteomics sample preparation, and supports recombinant protein processing and purification.
Applications	CARBOXYPEPTIDASE B is widely applied in protein sequencing detection kits and proteomics sample preparation reagent development.
CAS No.	80651-95-2
Synonyms	Carboxypeptidase B; Suc-Ala-Ala-Pro-Phe-SBzl
