

Catalase

Product Information

Cat#	DIA-676
Descriptions	Catalase is a ubiquitous antioxidant enzyme that efficiently decomposes hydrogen peroxide into water and oxygen, protects cells from oxidative damage, and is extensively applied in biochemical detection, food preservation and industrial biocatalysis systems.
Applications	Catalase serves as a core auxiliary reagent for oxidative stress detection kits and biochemical reaction system oxygen elimination reagent preparation.
CAS No.	9001-05-2
Synonyms	Catalase-peroxidase
