

Lipase

Product Information

Cat#	DIA-762
Descriptions	Lipase is a serine hydrolase that catalyzes the hydrolysis of triglycerides into free fatty acids and glycerol at the oil-water interface, and is one of the most widely used industrial enzymes in food, detergent and biodiesel production fields.
Applications	Lipase serves as a core raw material for triglyceride detection kits and lipid metabolism assay reagent development.
CAS No.	9001-62-1
Synonyms	Triacylglycerollipaza
