

Recombinant Asparaginase

Product Information

Cat#	DIA-818
Descriptions	Recombinant Asparaginase specifically hydrolyzes L-asparagine to aspartic acid and ammonia, deprives asparagine-dependent tumor cells of essential nutrients, and is a first-line therapeutic enzyme for acute lymphoblastic leukemia treatment.
Applications	Recombinant Asparaginase serves as a key raw material for asparagine metabolism detection kits and tumor nutrient deprivation assay reagent development.
Activity	≥ 20 U/mg
Assay	HNMR HPLC (Identification Methods)
Purity	≥ 98%
Storage	Store at -20°C for 2 years.
