

Recombinant Glutamyl Endopeptidase

Product Information

Cat#	DIA-827
Descriptions	Recombinant Glutamyl Endopeptidase specifically cleaves peptide bonds at the carboxyl side of glutamic acid residues, generates well-defined peptide fragments, and is ideal for protein sequencing and mass spectrometry-based proteomics sample preparation.
Applications	Recombinant Glutamyl Endopeptidase is applied in protein mass spectrometry detection kits and proteomics sample preparation reagent development.
Assay	HNMR HPLC (Identification Methods)
Purity	≥ 98%
Storage	Store at -20°C for 2 years.
Package	1 mg, 5 mg, 10 mg, 100 mg
