

Serratiopeptidase

Product Information

Cat#	DIA-853
Descriptions	Serratiopeptidase is a metalloprotease produced by <i>Serratia marcescens</i> that exhibits strong proteolytic activity toward fibrin and inflammatory exudates, reduces tissue edema and inflammation, and is widely studied for anti-inflammatory and fibrinolytic therapeutic applications.
Applications	Serratiopeptidase serves as a component for anti-inflammatory activity detection kits and fibrinolytic efficacy assay reagent development.
CAS No.	37312-62-2
