

L-Type Creatine Kinase Assay Kit

Product Information

Cat#	Kit-003
Description	Assay method: IFCC method
Synonyms	L-Type CK IFCC
Applications	For the in vitro quantitative determination of creatine kinase in serum or plasma. Clinically used as an aid in the diagnosis of cardiac function disorders.

Product Overview	Kit Components: L-Type CK IFCC enzyme solution: 4 × 280 mL L-Type CK IFCC substrate solution: 4 × 140 mL L-Type CK IFCC (LABOSPECT): 4 × 494 tests Enzyme calibrator: 4 × 3 mL Product Features: Wide linearity range High enzyme content with strong anti-interference performance
