

Urokinase Inhibitor 1

Product Information

Cat#	DIA-901
Descriptions	Urokinase inhibitor 1 is a specific protein inhibitor that tightly binds to urokinase-type plasminogen activator to block its fibrinolytic activity, regulates the plasminogen activation system, and is used for thrombolytic mechanism research and tumor invasion inhibition studies.
Applications	Urokinase inhibitor 1 is used for fibrinolysis regulation detection kits and urokinase activity inhibition assay reagent development.
CAS No.	256477-09-5
Synonyms	UK-371804
