

## Amylase (AMY) Assay Kit

### Product Information

<b>Cat#</b>	Kit-009
<b>Description</b>	Assay method: IFCC method
<b>Synonyms</b>	L-Type AMY IFCC
<b>Applications</b>	For the in vitro quantitative determination of amylase activity in serum or plasma. Clinically used as an aid in the diagnosis and monitoring of pancreatic diseases, abdominal disorders, and macroamylasemia.
<b>Product Overview</b>	<p><b>Kit Components:</b></p> <p>L-Type AMY IFCC enzyme solution: 4 × 250 mL</p> <p>L-Type AMY IFCC substrate solution: 4 × 100 mL</p> <p>L-Type AMY IFCC (LABOSPECT): 4 × 465 tests</p> <p>Enzyme calibrator: 4 × 3 mL</p> <p><b>Product Features:</b></p> <p>Ready-to-use reagent with good stability and linearity up to 3000 U/L</p> <p>Free from interference by endogenous glucose</p>
