

Native Human Creatine Kinase BB

Product Information

Cat#	NATE-1885
Similar	CKBB
Species	Human
Source	Human Brain
Description	Creatine Kinase BB is concentrated in the brain and lungs. Because the CKBB isoenzyme, CPK-1 isoenzyme is predominately found in the brain and lungs, injury to either of these organs (for example, stroke or lung injury due to a pulmonary embolism) are associated with elevated levels of this isoenzyme.
Form	Liquid, 50% Glycerol, 25 mM Imidazole, 1 mM DTE, pH 6.5.
Enzyme Commission Number	EC 2.7.3.2
Activity	> 500 U/mL
CAS No.	9001-15-4
Contaminants
