Amplify Enzyme

Product Information

Cat#	DIA-587
Description	<p>This amplification module is designed for use in transposase-based DNA library preparation workflows. It includes a library-specific DNA polymerase and optimized reaction buffer to ensure high amplification efficiency and uniformity.</p> <p>The module supports reliable amplification across a wide range of input amounts, with efficient performance using as little as 1 ng of starting DNA. It can be used as a complementary or replacement amplification component in compatible DNA library preparation workflows.</p>
Applications	Library amplification.
Package	96 rxns TAE: 96 μ L 5 \times TAB: 960 μ L
