

## AdvSTART Reverse Transcriptase

### Product Information

<b>Cat#</b>	ENZD-RT02
<b>Specification</b>	10000 U; 40000 U
<b>Unit Concentration</b>	200 U/μl
<b>Description</b>	AdvSTART Reverse Transcriptase is a reverse transcriptase that has been directionally modified from Reverse Transcriptase. It exhibits enhanced temperature tolerance, stability, and reverse transcription synthesis capabilities, making it suitable for high-temperature reverse transcription. AdvSTART Reverse Transcriptase is also particularly well-suited for one-step RT-qPCR reactions.
<b>Notes</b>	Warm-start RT enzyme.
<b>Features</b>	Excellent high and low template balance More suitable for self-built rapid one-step method system Higher stability
<b>Applications</b>	RT-qPCR self-built one-step method
<b>Components</b>	5 × AccurSTART Buffer; AccurSTART Reverse Transcriptase (200 U/μl)
<b>Quality Control</b>	Excellent high and low template balance; Adaptation for quick programs; Higher stability
<b>Shipping and Storage Conditions</b>	Store at -30 ~ -15°C, transport at ≤0°C.
