Diagnostic Enzymes

High II One Step qRT-PCR Probe Kit

Product Information

Cat#	ENZD-RT14
Specification	250 rxns (20 µl/rxn)
Applications	Virus Detection; Pathogen Detection; Gene Expression Analysis
Description	Suitable for high-sensitivity quantitative detection of RNA templates, compatible with various RNA types, with stable and reliable amplification. Integrates reverse transcription and qPCR in one tube, supports multiple amplifications, and requires no complex optimization.
Features	<ol style="list-style-type: none">1. High detection sensitivity: Able to detect templates with a few copies or 0.1 pg total RNA.2. Multiplex detection: Supports multiplex probe detection.
Components	RNase-free ddH ₂ O 2 × One Step U+ Mix One Step U+ Enzyme Mix 50 × ROX Reference Dye 1 50 × ROX Reference Dye 2
Shipping and Storage Conditions	Store at -20°C in the dark
