AdvStart One Step RT-PCR Kit

Product Information

Cat#	ENZD-RT24
Specification	50 rxns
Applications	Virus Detection; Gene Expression Analysis; Endpoint PCR Detection
Description	One-step RT-PCR kit, integrates reverse transcription and PCR in one tube to improve specificity and amplification efficiency. Contains 5× gDNA Wiper to remove genomic contamination, can detect as low as 0.1 pg total RNA and stably amplify up to 10 kb fragments.
Features	<ol style="list-style-type: none">1. High yield: The gel band color is deep and eye-catching.2. High sensitivity: Can detect RNA samples as low as 0.1 pg.3. gDNA clearance: Provides a gDNA clearance module to avoid genomic DNA contamination.
Quality Control	High yield High sensitivity
Components	5 x gDNA Wiper Mix 2x One Step RT-qPCR Master Mix 10 x DNA Loading Buffer
Shipping and Storage Conditions	Store at -30 ~ -15°C, transport at ≤0°C.
