Diagnostic Enzymes

Alanine Aminotransferase, 100 U/mg, from Porcine Heart

Product Information

Cat#	TRA-068
Specification	200U,1KU
Description	ALT (high specific activity, pig heart-derived) is used for quality control and calibration of liver function diagnostic reagents.
Applications	Alanine aminotransferase (ALT) serves as a marker for monitoring the extent of liver cell damage and repair processes in biomedical research. In drug development and screening, ALT functions as a key indicator for assessing potential hepatic toxicity and therapeutic efficacy of pharmaceutical compounds.
CAS No.	9000-86-6
Form	Powder
Activity	100 U/mg
Storage	Store at -20°C in sealed containers.
