

Native Proteus sp. Glutamate Dehydrogenase (NADP-dependent)

Product Information

mitochondria of eukaryotes, as are some of the other enzymes required for urea synthesis, that converts glutamate to α-ketoglutarate, and vice versa. In animals, the produced ammonia is usually used as a substrate in the urea cycle. Typically, the α-ketoglutarate to glutamate reaction does not occur in mammals, as glutamate dehydrogenase equilibrium favours the production of ammonia and α-ketoglutarate. Applications This enzyme is useful for enzymatic determination of NH ₃ , α-ketoglutaric acid and L-glutamic acid, and for assay of leucine aminopeptidase and urease. This enzyme is also used for enzymatic determination of urea when coupled with urease in clinical analysis.		
Alias GLDH Source Proteus sp. Description Glutamate dehydrogenase (GLDH) is an enzyme, present in most microbes and the mitochondria of eukaryotes, as are some of the other enzymes required for urea synthesis, that converts glutamate to α-ketoglutarate, and vice versa. In animals, the produced ammonia is usually used as a substrate in the urea cycle. Typically, the α-ketoglutarate to glutamate reaction does not occur in mammals, as glutamate dehydrogenase equilibrium favours the production of ammonia and α-ketoglutarate. Applications This enzyme is useful for enzymatic determination of NH₃, α-ketoglutaric acid and L-glutamic acid, and for assay of leucine aminopeptidase and urease. This enzyme is also used for enzymatic determination of urea when coupled with urease in clinical analysis. Appearance Solution with 50mM Tris-HCl buffer containing 0.05% NaN₃ and 5.0mM EDTA, pH 7 Form Freeze dried powder Enzyme EC 1.4.1.4 Commission Number Activity 300U/mg-protein or more (9,000U/ml or more) CAS No. 2604121 Contaminants NADPH oxidase < 1.0×10⁻²% Glutathione reductase < 1.0×10⁻²% (Gradell-209) < 1.0×10⁻³% (Gradelll-309)	Cat#	DIA-196
Similar GLDH Source Proteus sp. Description Glutamate dehydrogenase (GLDH) is an enzyme, present in most microbes and the mitochondria of eukaryotes, as are some of the other enzymes required for ureal synthesis, that converts glutamate to α-ketoglutarate, and vice versa. In animals, the produced ammonia is usually used as a substrate in the ureal cycle. Typically, the α-ketoglutarate to glutamate reaction does not occur in mammals, as glutamate dehydrogenase equilibrium favours the production of ammonia and α-ketoglutarite. Applications This enzyme is useful for enzymatic determination of NH₃, α-ketoglutaric acid and Light glutamic acid, and for assay of leucine aminopeptidase and urease. This enzyme is also used for enzymatic determination of ureal when coupled with urease in clinical analysis. Appearance Solution with 50mM Tris-HCl buffer containing 0.05% NaN₃ and 5.0mM EDTA, pH 7 Form Freeze dried powder Enzyme EC 1.4.1.4 Commission Number Activity 300U/mg-protein or more (9,000U/ml or more) CAS No. 2604121 Contaminants NADPH oxidase < 1.0×10-2% Glutathione reductase < 1.0×10-2% (Gradell-209) < 1.0×10-1% (GradellI-309)	Abbr	GLDH (NADP) (Proteus sp.)

Native Proteus sp. Glutamate Dehydrogenase (NADP-dependent)

Isoelectric point	4.6
pH Stability	pH 6.0-8.5 (25°C, 20hr)
Michaelis Constant	1.1×10 ⁻³ M (NH₃), 3.4×10 ⁻⁴ M (α-Ketoglutarate), 1.2×10 ⁻³ M (L-Glutamate), 1.4×10 ⁻⁵ M (NADPH), 1.5×10 ⁻⁵ M (NADP⁺)
Structure	6 subunits (M.W.50,000) per mol of enzyme
Optimum pH	8.5 (α-KG→L-Glu) 9.8 (L-Glu→α-KG)
Optimum temperature	45°C (α-KG→L-Glu) 45-55°C (L-Glu→α-KG)
Thermal stability	below 50°C (pH 7.4, 10min)
Stability	Stable at 5°C for at least 6 months
Stabilizers	Ethylenediaminetetraacetic acid (EDTA)
Inhibitors	Hg**, Cd**, p-chloromercuribenzoate, pyridine, 4-4'-dithiopyridine, 2,2'-dithiopyridine
Synonyms	glutamate dehydrogenase (NADP+); glutamic dehydrogenase; dehydrogenase; glutamate (nicotinamide adenine dinucleotide (phosphate)); glutamic acid dehydrogenase; L-glutamate dehydrogenase; L-glutamic acid dehydrogenase; NAD(P)-glutamate dehydrogenase; NAD(P)H-dependent glutamate dehydrogenase; glutamate dehydrogenase (NADP); EC 1.4.1.4; GLDH

Fax:1-631-938-8127 45-1 Ramsey Road, Shirley, NY11967, USA
