Product Information

| | |
|-------------------------|---|
| Cat# | TRA-567 |
| Specification | 5µg(min) |
| Description | Full-length human GPRK6 was produced as an N-terminal GST fusion protein using a baculovirus expression system. GST-GPRK6 was isolated via glutathione sepharose chromatography. The GST tag was removed by PreScission protease cleavage, and the GST-free GPRK6 65 kDa was collected in the flow-through fraction from a subsequent glutathione sepharose step. |
